

EXPERIMENT – 15

EMBEDDED C PROGRAM TO CONVERT HEXADECIMAL DATA TO DECIMAL

AIM: To write an Embedded C program to convert hexadecimal numbers into decimal and display the digits on ports using Keil software.

OBJECTIVES:

1. To read hexadecimal data using the 8051 microcontroller.
2. To separate the decimal value into hundreds, tens and units.
3. To display the decimal digits on P0, P1 and P2.

PROGRAM:

```
#include <reg51.h>
void main(void)
{
    unsigned char hexa = 0x08;
    unsigned char hundreds, tens, units;
    ACC = hexa;
    B = 10;
    ACC = ACC / B;
    units = B;
    B = 10;
    ACC = ACC / B;
    tens = B;
    hundreds = ACC;
    P0 = units;
    P1 = tens;
    P2 = hundreds;
    while(1);
}
```

OUTPUT IMAGE:

RESULT:
Thus the program has been successfully verified and executed.

RESULT:

Thus the program has been successfully verified and executed.
